Narrative voice in animal farm worksheet answers free online free printable

While the story is told from the simple point of view and the trust of animals, the reader is constantly remembered that his perspective is very limited. Individual animals may remember what really happened in the battle of the Cowshed, but as readers are not accessing individual points of view, they can not be sure. Occasionally, the reader receives brief glimpse from an individual point of view of an animal, most of the time clover, because clover and boxer are the heart of the animal group. When pigs make it dangerous to tell the truth, the false verses of battle is accepted, even by the narrator, as the collective scan, and no more matter if individual animals remember more something different. For example, when Napolean takes the milk from cows to pigs, all readers are informed that when animals "came in the night, it was noted that milk disappeared" (Chapter 2). The irony here comes from the gap between what the animals come - that the milk is missing - and what the reader will: which has taken it. The narrator does not know what the pigs say and do when they are separated from other animals, and we rarely see the action through the eyes of individual animals. The effect can be made, chilling or sad, and sometimes the three of the time. The collective point of view also creates deep ironies on the animal farm. In emphasizing the gap between what the inhabitants of the farm will and what readers come as outsiders, the book invites readers to look at their own society with their eyes from the outside. eyes.
